

LLW disposal facilities. The NRC believes that because there would be no health and safety benefit from the proposed change in requirements, it is inappropriate to take an action which could have an adverse impact on the timely development of safe LLW disposal facilities.

For reasons cited in this document, the NRC denies the petition.

[Docket No. 94-SW-28-AD]

Airworthiness Directives; Bell Helicopter Textron, Inc. Model 214ST Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to Bell Helicopter Textron, Inc. (BHTI) Model 214ST helicopters. This proposal would require creation of a component history card using a Retirement Index Number (RIN) system; would establish a system for tracking increases to the accumulated RIN; and would establish a maximum accumulated RIN for the pillow block bearing bolts (bearing bolts). This proposal is prompted by fatigue analyses and tests that show certain bearing bolts fail sooner than originally anticipated because of the unanticipated high number of takeoffs and external load lifts utilizing high-power settings in addition to the time-in-service (TIS) accrued under other operating conditions. The actions specified by the proposed AD are intended to prevent fatigue failure of the bearing bolts, which could result in failure of the main rotor system and subsequent loss of control of the helicopter.

DATES: Comments must be received by February 21, 1997.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Office of the Assistant Chief Counsel, Attention: Rules Docket No. 94-SW-28-AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.
